

## COMPANY CAPABILITY STATEMENT

QUARRY MINING is an Australian manufacturer of mining tools who has been working closely with the LITECH GROUP in China to produce world class products for the promotion of our local Australian and international business.

Quarry Mining Litech specializes in rotary drilling consumables and handheld pneumatic machines specific to use in underground coal mines. Our vision is to combine the strengths of the expertise and innovation known to the Australian underground coal market and the efficiencies that the Chinese bring to the manufactured product.

These business strengths will allow for the safest, highest quality products for coal and soft rock mining to be shared to all corners of the globe.

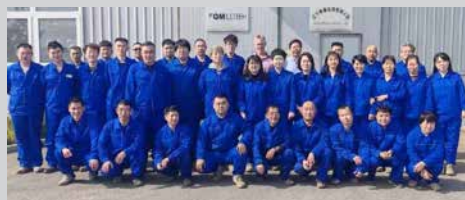

### LIST OF PRODUCTS:

- Primary and secondary roof support drilling
- Handheld roof and rib bolt drilling
- Specialized tools and adaptors for bolt installation
- Grouting equipment for small access areas

As an Australian manufacturer, Quarry Mining is excited to partner with Litech in China to ensure our business gains a critical edge through the approach to responsiveness, improvisation, flexibility, and speed that Chinese companies have to offer.

### Proud Preferred Suppliers to:

- Anglo American
- BHP Mitsubishi Alliance
- Centennial Coal
- Fitzroy Resources
- Glencore
- Kestrel Coal Resources
